No. S. P. C. 17118-32, *dated 25th March* 1935.

To

The Firms dealing in Pumping Sets.

Enquiry No. 1291.

AN ENGINE AND CENTRIFUGAL PUMP REQUIRED FOR KONANUR WATER WORKS.

GENTLEMEN,

Please intimate your best price and the earliest time of delivery for an Engine and Centrifugal Pump, as per specification, below :—

Detailed specification of the equipment together with descriptive pamphlets should accompany the tender.

The prices quoted should be for delivery f. o. r., Hole-Narsipur.

The enquiry will close on the 15th May 1935.

Specification for the Engine and Centrifugal Pump required for Konanur Water Works.

Engine :—

The Engine may be horizontal or vertical totally enclosed, four cycle type running on heavy crude or residual oils as well as more refined oils. It should be simple in construction and should start in cold state without preheating. It should be thoroughly reliable and remarkably low in fuel consumption. The lubrication should be of forced type ensuring of perfect lubrication of all wearing parts. It should be at the same time economical in lubricating oil consumption.

The Engine should be equipped with a suitable and reliable governor with automatic adjustment.

All parts should be easily accessible so as to admit of quick dismantling and replacement.

All the wearing parts should be quite strong and the cams, rollers, pins, etc., should be hardened and ground to size.

The Engine should have a capacity of 8 B.H.P. or thereabouts and it has to work at an altitude of about 2,500 ft. above sea level.

The Engine above all should be highly efficient.

The Engine should drive a centrifugal pump capable of discharging about 3,000 gallons against 200 ft. head and as such should be provided with a pulley of suitable diameter and face.

Foundation bolts, drawings and necessary tools for the complete unit should also be included.

Centrifugal Pump :—

The Centrifugal pump is to discharge about 3,000 gallons per hour against 200 ft. head. It has to pump raw water and should preferably be with horizor tally split casing provided with suitable ball bearings. It should be of belt driven type with fast and loose pulleys with striking gear.

The shaft should be provided with renewable sleeves as it has to pump unfiltered water.

The impellers should be of high grade phospher bronze and should have renewable neck rings.

The stuffing box should be with renewable bushes and the glands split.

The pump should be provided with a substantial C. I. bed plate, and the suction lift should on no account be less than 20 ft., the efficiency being as high as possible.

The pump should be provided with a suitable pulley to get the required r. p. m.

Foundation bolts, priming funnel with cock, pet cocks and in addition (1) C. I. Foot valve with strainer, (2) C. I. double flnaged non-returning valve, (3) C. I. double flanged delivery valve with hand wheel, and (4) 6″ pressure gauge with 200 feet head should all be included.

Both the engine and pump should be considered as one and quoted for f. o .r., Hole-Narsipur.

The usual drawings, instruction books, etc., should also be supplied.

The time of delivery should invariably be mentioned.

No. S. P. C. 17137-50, *dated 25th March* 1935.

To

The Firms dealing in Cocoanut Oil.

Enquiry No. 1292.

COCOANUT OIL.

GENTLEMEN,

Sealed tenders will be received by the undersigned up to 10*th April* 1935 for the supply of cocoanut oil required for the Government Soap Factory.

Tenders submitted in response to this notice shall be subject to the following conditions :—

(1) An earnest money of Rs. 100 should be remitted to the State Huzur Treasury and the fact of such remittance should be mentioned in the tender.

(2) The quantity required will be 50 tons.

(3) The material will be required to be delivered at the Soap Factory in new, non-leaky and non-returnable tins in four equal instalments commencing about the 3rd week of April 1935.

(4) The quality of oil required should be of the first quality and quite pure. It should also be colourless and free from impurities or adulteration and the oil should be quite suitable for soap-making.

(5) Two sets of sealed samples of the oil offered should accompany the tender. They should be about one pint in quantity. The Stores Purchase Committee will have these samples tested and analysed and the cost of such test and analysis, *viz.*, Rs. 15 per sample should be remitted to the undersigned separately by money order. Tenders not complying with this condition will not be considered.

(6) Supplies made otherwise than in accordance with the accepted quality will be rejected at the contractor's risk and they will be required to replace the rejected supplies by correct material conforming to the approved quality.

(7) Failure to make supplies in time and according to approved quality will entail cancellation of the contract and purchases being made from other sources at the risk and expense of the

contractors. The extra cost if any, incurred on account of such purchases will be debited to the defaulting contractors. In such an event, the Committee will also reserve to themselves the right to levy a penalty of 3 per cent of the value of the order as and by way of liquidated damages.

(8) The successful tenderer should be prepared to execute an agreement and deposit an amount equal to five per cent of the value of the order as security for proper performance of the contract within 15 days from the date of receipt of the order.

(9) Withdrawal from tender before acceptance is communicated or failure to make supplies as stipulated will entail forfeiture of earnest money deposited with the tender.

(10) Quotations should be telegraphed if necessary furnishing samples for test to reach the undersigned by the abovementioned date.

Yours faithfully,
V. VEDAVYASACHARYA,
Secretary,
Stores Purchase Committee.

No. S. P. C. 17090, *dated 22nd March* 1935.
